ABOUT ME

AI & Data Science student focused on developing scalable, real-world solutions through AI and web development. Proven ability to bridge technical complexity with practical application through strong communication and user-focused design.

EDUCATION

Velagapudi Ramakrishna Siddhartha Engineering College	Vijayawada
BTech – Information Technology, CGPA : 8.1(1 st Year)	2024 – 2028
Sri Chaitanya Junior College	Vijayawada
Intermediate – MPC, Percentage : 91.3%	2022 – 2024
Chaitra English Medium School	Vijayawada
10 th Grade – SSC ,Percentage :88.5%	2010 - 2022

TECHNICAL SKILLS

Programming: Python, C, Java, SQL

AI & Cloud: Vertex AI, Prompt Design, Supervised Machine Learning, NLP ,D

Tools & Databases: Git, Google Cloud, MongoDB, Render, WhatsApp API

Soft Skills: Teamwork, Adaptability, Resilience, Public Speaking

CERTIFICATION COURSES

- **Digital Awareness, C Essentials 1-** April 2025(Cisco)
- **AI For Everyone- June 14, 2025** (Coursera)
- **Supervised Machine Learning:** Regression and Classification- **July 16, 2025** (Coursera)
- **Prompt Design in Vertex AI Skill Badge** Issued by [Google Cloud](#)
- **Python Programming with Codegnan IT Solutions Pvt Ltd!**
- **Data Analysis with Python – Dec 26,2025** (Coursera)
- **The Structured Query Language(SQL) - Dec 29,2025** (Coursera)
- **Full Stack Web Development with SmartED Innovations**

ADDITIONAL ACADEMIC PURSUITS

- **Python Programming Mastery:** Completed an intensive coaching program at Codegnan, mastering clean coding, complex problem-solving, and advanced debugging through hands-on practice.
- **Technical Versatility:** Developed a suite of mini-projects applying Python to automation, data analysis, and AI, gaining proficiency in building production-ready scripts and system integration.
- **Core Analytical Focus:** Specialized in Statistics, Machine Learning, and Data Analytics with a dedicated focus on leveraging these frameworks for data-driven business decision-making.

PROJECTS

- **Smart Car Parking System:** Developed an embedded system with real-time LCD slot updates and audible alerts using a design thinking framework.
- **Syllabus Genius:** Built an NLP-powered web app that parses university PDFs into personalized study plans with auto-curated YouTube tutorials.
- **WhatsApp-Reminder:** Created a privacy-focused, local-run bot using the Baileys library for scheduling time-based reminders via simple chat commands
