PROFESSIONAL SUMMARY

AI & Data Science undergraduate (3rd year, CGPA 8.1) with hands-on experience in Python, SQL, Java, and C, built through coursework, industry certifications, and independent projects. Delivered four end-to-end applications spanning NLP, mobile development, embedded systems, and automation, using cloud-connected databases including MongoDB and Firebase. Proficient in Git, Google Cloud Platform, and Vertex AI, with strong debugging, automation, and system-integration skills.

TECHNICAL SKILLS

- Programming Languages: Python, Java, C, SQL
- Cloud & AI/ML: Google Cloud Platform, Vertex AI, Prompt Design, Supervised Machine Learning, Natural Language Processing (NLP)
- Databases & Tools: MongoDB, SQL, Git, Render, WhatsApp API, Flutter, Firebase
- Development Practices: Debugging, Clean Coding, Automation, System Integration, Problem-Solving
- Soft Skills: Teamwork, Adaptability, Resilience, Public Speaking

PROJECTS

Syllabus Genius — NLP-Based Web Application

- Built an NLP-powered web application that parses university PDF syllabi into personalized study plans, helping students organize exam preparation more efficiently.
- Integrated automated curation of relevant YouTube tutorials for each syllabus topic, reducing the time students spend searching for study resources.

Smart Dairy Farm Ecosystem — Mobile Application | *Ongoing*

- Developing a dairy farm management application that lets owners track customers, workers, milk delivery, and payments from a single interface.
- Designed a user-friendly Flutter interface with Firebase-based authentication and real-time data storage, ensuring secure and instant data sync across devices.

WhatsApp Reminder Bot — Automation Tool

- Built a privacy-focused, locally-run reminder bot using the Baileys library, enabling users to schedule and receive time-based reminders through simple chat commands without relying on third-party servers.

Smart Car Parking System — Embedded System

- Developed an embedded system with real-time LCD slot updates and audible alerts, applying a design-thinking approach to guide drivers to available parking spaces.

EDUCATION

Bachelor of Technology — Artificial Intelligence & Data Science

2024 – 2028

CGPA: 8.1 (3rd Year)

Intermediate (MPC)

2022 – 2024

Percentage: 91.3%

SSC (10th Grade)

2020 – 2022

Percentage: 88.5%

CERTIFICATIONS

- Data Analysis with Python — Coursera (December 2025)
- The Structured Query Language (SQL) — Coursera (December 2025)
- Supervised Machine Learning: Regression and Classification — Coursera (July 2025)
- AI For Everyone — Coursera (June 2025)
- Digital Awareness and C Essentials — Cisco (April 2025)
- Prompt Design in Vertex AI — Google Cloud Skill Badge
- Python Programming — Codegnan IT Solutions Pvt Ltd
- Full Stack Web Development — SmartED Innovations
